

From 9G:

Coming North or South on 9G look for Primrose Hill Road or Dutchess County Route 84. If you are coming from points south then you will take a right in order to go east. If you are coming from points north you will take a left to go east. (The signs at this intersection contradict each other. The local street signs indicate Primrose Hill Road can be had either west or east. The County Route 84 sign points west only. Various direction websites add to the confusion showing Primrose Hill Road not going east. The truth is Primrose Hill Road ends about 100 yards to the east where it then turns into Schultz Hill Road.) Travel for a few seconds on Primrose Hill Road and experience it turning into Schultz Hill road by watching it gently bend towards the right. At 6 tenths of a mile the road curves sharply to the left. It's almost a perfect 90 degree turn so be careful. At one mile you will take a left-hand turn onto Mountain View Road. At about 1.3 miles you will see a Green mailbox on the right-hand side of the road that says "Ashworth." The driveway is on the opposite side of the road so you will take a left onto a crushed stone driveway. You can't see the studio from the road but go up the hill and you will find us.
